

2026 SMUCE INDUSTRY OUTREACH

What is SMUCE?

The Society of Monash University Chemical Engineers (SMUCE) is a student-led organization dedicated to bridging the gap between academic learning and professional Chemical Engineering practice. Since 1962, SMUCE has cultivated strong industry engagement through initiatives such as networking events, site tours, job promotion opportunities, and professional development programs. Complementing our industry focus, we also host a range of social events, from study sessions, BBQs to semester celebrations and infamous annual Cocktail Night, to foster community and connection among students.

Ultimately, our mission is to equip future engineers with the necessary skills, networks, and confidence needed for a seamless transition into the workforce. We see the best way to do this is through building meaningful partnerships with industry leaders such as yourselves.

2026 Initiatives

As we plan for 2026, we aim to continue doing impactful initiatives in partnership with your industrial and financial support. Ultimately our main goals are as follows:

Connect

Connect students with industry

Employability

Build students' employability and professional skills through these events

Engagement

Create opportunities for employers to build genuine personal connections with our upcoming engineers

Our 2026 activities focus on 3 key areas, each designed to foster meaningful connections and create value for both students and industry partners.

VCES TRI-UNI INDUSTRY NIGHT

Industry networking events offer students a valuable opportunity to connect with a wide range of companies in a semi-formal setting. These events feature sponsor presentations followed by open networking sessions, where company representatives host information stalls to share employment opportunities.

SMUCE is committed to hosting an industry networking event in the first semester of 2026 and may add a second event in Semester 2 based on industry interest. The confirmed event is the annual Tri-Uni Industry Night which is a collaboration with RMIT and the University of Melbourne. It will take place mid to end of March, at Melbourne University. More details of the event will be available ASAP. This long-standing event consistently receives positive feedback, with last year attracting over 100 students and 20+ companies.

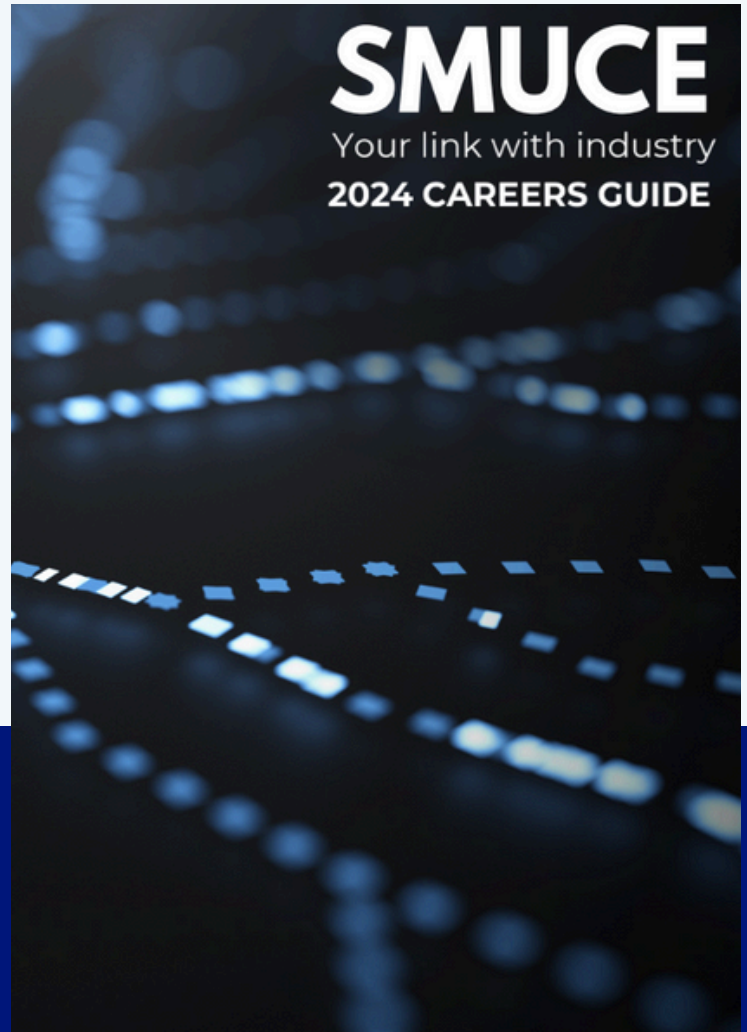

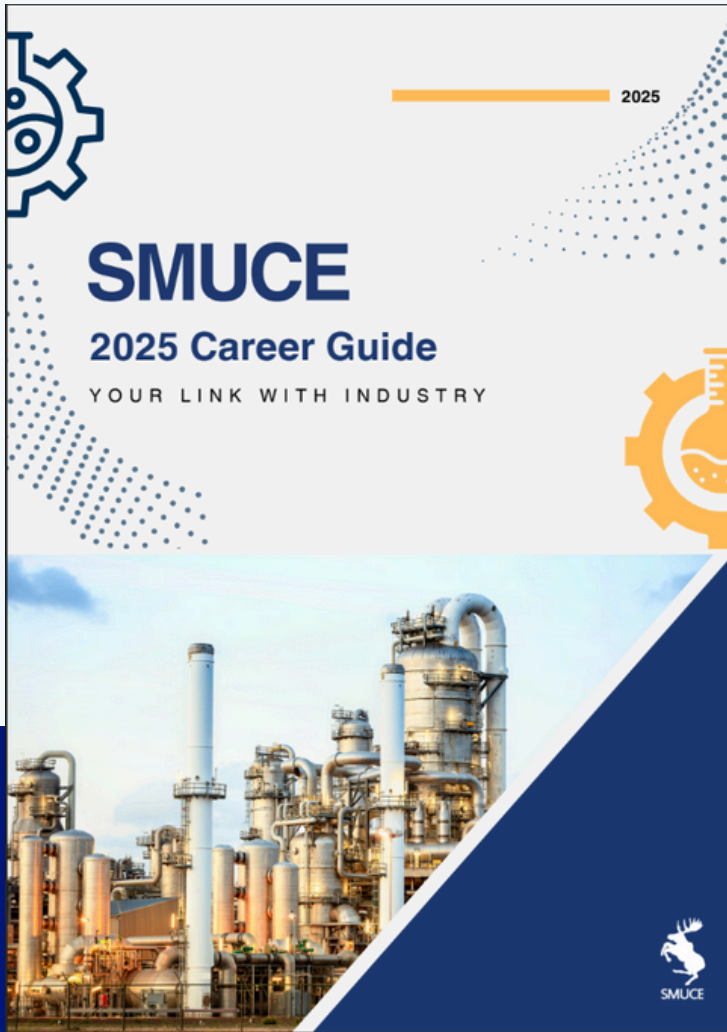

MENTORING NIGHT

SMUCE's mentoring events provide students with the opportunity to connect directly with practicing Chemical Engineers from a diverse range of organisations in a relaxed and informal environment. Through structured mentor insights and open networking sessions, students gain first-hand perspectives on career pathways, workplace experiences, and industry expectations.

Originally introduced in Semester 2 of 2023 in collaboration with the Joint Victorian Chemical Engineering Committee (JVCEC), these events received strong engagement, attracting over 40+ students and 10+ industry mentors. Building on this success, SMUCE plans to continue mentoring nights and career guide distribution in Semester 2 of 2026, with additional initiatives to be announced.

CAREERS GUIDE

SMUCE's annual career guide is a comprehensive resource for students to use to explore more about opportunities in Chemical Engineering. The guide brings together a range of academic and industry perspectives and experiences to offer practical advice and meaningful insights into the many opportunities within the field. Past editions of the guide are available on the SMUCE website.

INDUSTRY INSIGHT SERIES

Industry Insight Series provides companies with a focused platform to engage directly with Monash University Chemical Engineering students at the Clayton campus. These sessions allow organisations to showcase their work, highlight graduate and internship opportunities, and share practical industry insights in an interactive setting.

Aligned with SMUCE's commitment to supporting student career development, these sessions hope to equip students with valuable knowledge, professional perspectives, and industry connections to support a smooth transition into the workforce. Scheduling is flexible and arranged in consultation with participating organisations to ensure a tailored and impactful experience.

MERCHANDISE

SMUCE 2025 Merch featured hoodies, shirts, and crew necks for our Chemical Engineering students. Sponsors can have their logo featured to promote their brand. Logo size and placement will vary by sponsorship tier, offering a unique chance to align your brand with SMUCE and connect with students.

HOW YOU CAN GET INVOLVED?

SMUCE OFFERS SEVERAL WAYS FOR YOUR ORGANISATION TO ENGAGE WITH OUR NEXT GENERATION OF CHEMICAL ENGINEERS:

INDUSTRY SPONSOR

Sponsorship provides the most impactful and strategic avenue to engage with our student cohort. As a sponsor, you will receive enhanced visibility, priority access to events, and tailored opportunities to build meaningful, long-term relationships with students. SMUCE will work closely with you to align involvement with organisational goals and promise maximum engagement within the Monash Chemical Engineering community.

INDUSTRY SUPPORTER

For organisations seeking a lower-commitment option, becoming an Industry Supporter offers a flexible way to stay connected. Industry Supporters will also be invited to participate in SMUCE initiatives and events as opportunities arise.

We recognise that organisations have varying engagement objectives and we welcome both supporters and sponsors. The following pages outline the benefits associated with each package to help you determine the most suitable way to collaborate with SMUCE.

If you are interested, please complete our expression of interest [**FORM**](#), and a member of the SMUCE Industry Team will be in touch to discuss next steps.

*PLEASE NOTE: THE PARTNERSHIP PRICES NOW INCLUDE SPONSORSHIP OF THE VCES INDUSTRY NIGHT. COMPANIES ARE WELCOME TO DISCUSS THE PACKAGES FURTHER SHOULD THEY WISH TO MAKE ANY CHANGES.

Partnership Outline
